HONORABLE HOWARD EDWARDS, A.M., LL.D.
President of Rhode Island State College

TO one who has had ever before him a vision of the ideal; who has steadfastly adhered to his path of duty in the time of trial; who has devoted his entire life to the service of his adopted state, and has guided her sons in the way of duty and service—to Doctor Howard Edwards, our beloved President, this volume is respectfully and affectionately dedicated.

Dedication

FREDERICK DELMONT TOOTELL
Faithful Advisor of the Class of 1929

IN presenting this, the 1929 Grist, we acknowledge the passing of another great milestone in the history of our college and our state.

With the recognition of the people of the state prominently placed before us in our new buildings, we have been strengthened anew in the discharge of the trust confided to us by the people.

The Class of 1929, first to graduate with these gifts at its disposal, earnestly desires to acknowledge this trust and to assist in its discharge, wherever the Grail of life may lead its members.

HONORABLE NORMAN S. CASE

Governor of Rhode Island

Governor Case's Message

When a great general declared that the Battle of Waterloo was won on the cricket field at Eton, he recorded, in a picturesque manner, a truth which many learn too late; the truth that the victory of life was won, not on the fields where the decisive struggle occurs, but in the forgotten hours of preparation. Success or failure lies in our hands long before the hour of final test comes. Knowledge can not be gained on short notice, except by the person whose mind is already well stocked; a particular skill can be acquired rapidly only by the person who has trained all his faculties.

In the higher fields of success there are no accidents; men and women reap precisely what they have sown; they do well what they have prepared to do. This preparation is often unconscious. The larger and deeper part of preparation for the greater experiences and works of life is always unconscious. We do not realize when we are making ourselves strong, rich and powerful in resource and character. Nothing is lost on the person who is bent upon growth; nothing wasted on one who is always preparing for his work and his life by keeping his eyes, mind and heart open to nature, books and experience.

One of the functions of our Rhode Island State College is to build strong men and women; men and women who will be a true force in the world. The State has been liberal in an effort to supply needs to that end. I congratulate members of the Class of '29 upon attaining that prized goal which fits them for the larger duties of life.

Rhode Island appreciates the efforts of President Edwards and his associates in their earnest labor. Through their efforts, supported by our General Assembly, Rhode Island State College is keeping abreast of the times. The new library, engineering building, auditorium and gymnasium are gifts from generous people in recognition of student loyalty, interest and determination.

NORMAN S. CASE
GOVERNOR

Providence, R. I., April 24, 1929.

A Benison

THE weighty and portentous thing about Time is that it has no reverse gear. Relentlessly it rushes ever forward and bears us with it onward. To mark our passage we make our fleeting records and leave them at intervals that others, following behind us, may know that we have passed this way—and when and how.

This is the meaning of the GRIST of Nineteen Twenty-Nine. In the neat row of GRISTS it takes just now the latest place. Like its predecessors it is a student effort to fix and visualize a moment in the flowing life of the College. Worthily and helpfully those who have labored before us have portrayed the College year by year, and as we have looked through their eyes—through what they have given us in their GRISTS—we have been able to see and to rejoice in the strong, wholesome, pulsing life of our Alma Mater in those other stages of her development, forerunners of our own. For those that follow us may this our GRIST of 1929 perform an equal service. Both in the life it reveals and in the manner of revealing that life, may it be worthy of the succession, past and to come, in which it now takes its place.

Alma Mater

*Fruitful dream of a visionary
Begun in the humblest way,
Adopted protectress of an earnest youth,
Slow nurtured for many a day;*

*Symbol of an idealistic race,
Starved for political gain;
Serving, while begging the means to serve,
At the breasts we students drain.*

*We children of peasants for knowledge suck
At paps held dry by neglect,
While those of the rich in Follie's muck
Drink deep with their favored sect.*

*How well of granite thy halls were built,
To wait a day of parity;
How well atop a rocky hill,
Oh, mother in frugality!*

*Live on, to noble lessons teach,
Withstand the ignorant scorn;
Cuddle thy babes in thy tortured arms,
Hail! The chill gray light of dawn!*

Class History of 1929

WILLIAM B. TRUMBULL	President
EMILY S. HEAP	Vice-President
CELESTE A. BOSS	Secretary
F. DELMONT TOTEILL	Faculty Member
KENNETH H. MACKENZIE	Treasurer

In harmony with the rapid development of our Alma Mater the class of '29 has set a precedent in student achievement for the classes who are to follow us. Class co-ordination has been the keynote of our success throughout our four years.

We began our Freshman year by providing yearling athletic teams which were the nucleus of the varsity material in our last three years. Our "Frosh" basketball team surpassed all previous records and then in their last year they furnished their Alma Mater with the greatest Basketball Team Rhody has ever had.

Socially, our entire four years have been glorious successes. Our first major dance, namely the Soph Hop, illustrated our real ability to obtain class organization and support. Then on through the years we maintained that class devotion which predominated in all of our activities.

Deviating from the lighter side of life the class of '29 ventured into the scholastic realm by achieving high honors in every department of our institution.

And now we are at the end. Four years of close friendship has enshrouded our sojourn in Kingston with a happiness we shall never forget. We are about to leave. May the success which we have achieved follow us into the world, to bring honor and glory to our Alma Mater.

NICHOLAS ABBENANTE

"NICK," "ABBIE" Electrical Engineering
Orchestra (3, 4); Band (3, 4); Student Band (4); Track (1, 2); Glee Club (2, 3, 4); Junior Prom Committee (4); Commencement Ball (3); Assistant Manager, Orchestra (4).

Music and "Abbie" are synonymous. Whenever the strains of some peppy melody are heard on the piano, close observation discloses "Abbie" tickling the "ivories." School spirit personified, he was sure to be found at every athletic contest and student function. However, music is a pastime in which he indulges only when not engrossed in some problem, for "Abbie" is another "electricricker" who wants to electrify the world with his genius. There is a heap of genius in the "five foot two" that means "Abbie" to the Campus.

EDWARD ACETO
Providence, R. I.

"CHAUNCEY," "Eb" Electrical Engineering
Student Branch A. I. E. E. Society (3, 4); Fraternity Basketball (3, 4); Football (1).

"Chauncey" is our representative from the wilds of Providence, who came to "Rhody" in the fall of 1925 to probe the intricacies of "Andy's" courses. He immediately proceeded to make a name for himself on the campus as a member of the Three Musketeers, and the notorious King Phillip House gang. A ready smile, keen wit, and the ability to appreciate a joke, even though he be the "goat," have endeared "Chauncey" in our hearts forever. We wish you plenty of luck and feel that you will succeed in any endeavors which you undertake in the future.

EDWARD GEORGE ANDERSON

"ANDY" Chemical Engineering
Track (1, 2, 3, 4); Cross Country (1, 2, 3, 4); Chemical Society (2, 3, 4); Art Editor Grist; Publicity Committee; Poster Committee.

"Andy," it seems, has been given a mis-nomer. He should have been called "Safety Razor." He's a "Gem," "Ever-ready" with keen humor. Not only can he crack a joke, but he can draw, and how! His four years at Rhody saw more and fancier posters than any other period in the history of the college.

Is "Andy" a chemist? Boy! How that fellow can chemistrate. We expect that in a few years he will have concocted some conglomeration that will kill 456.71 guinea pigs with one drop.

HENRY NORMAN ARMERBRUST, Σ A E

"ARMY" General Science

Rope pull (1, 2); Glee Club (1, 2); Beacon Board (1, 2, 3); Subscription Manager (3); Student Council (2, 3, 4); President Lecture Association (4); Sergt. R. O. T. C. (3); Lieut. (4); Rifle Team (1, 2, 3); Capt. (3); Coach (4); Officer's Club; Chem. Soc.; Soph. Hop Com.; Junior Prom Com.

One who has noted "Hen's" frequent change of cars—he trades the old buggy in for another old one every year—would think that he had the basic instincts of a horse trader, but his real passion is the army and target shooting, not to mention a young lady who seems to appear at all the campus dances. A leader in several campus activities and a supporter of all of them, Army's graduation is a real loss to the campus community.

GUIDO MARIO ARMENO
Providence, R. I.

"ARMENO" Applied Science

Track Squad (1, 2); Chemistry Society (1, 2); Biological Society (4).

"Armeno came to us from the Providence Technical High School with a determination to probe into biological problems. A sturdy, cheerful youth he has been, and that we feel, he will always remain.

Possessed of a congenial nature and a pleasing personality, "Armeno found no difficulty in making friends. We feel that we will always remember him as the industrious determined youth. No matter what he decides to do we feel confident that his perseverance and never-say-die spirit will yield no other return but success, and we wish him the best of luck.

Tennis (1, 2, 3, 4).

When Ruth came to us from Cranston High, she was a very quiet and sedate girl. Though four years have not wrought much change in her, all that know her admire her sterling qualities. She is a true friend, a very good student, and a fine tennis player.

When Ruth leaves Rhode Island, she intends to teach school, and we all know that she will have the respect of her students as she has of her class mates. Much success and happiness, "Barnesie!"

"Nat"
And here's a man. Quiet to the point of being retiring, and unassuming, but not to a fault. He has always ranked very well scholastically and is a really interesting friend and classmate. He studies for the joy of studying and it reflects in the results. To listen to Nathan is to gain valuable knowledge.

And practically, as the ads at the Post Office have ever reminded us, "Nate" has shown himself to be no mean upholsterer.

Basket Ball! Celeste is right there when it comes to basketball. For three years she played on the class team and this year she was a member of our victorious Varsity Squad.

Not only in athletics does Celeste shine. For two years she has been secretary of our class—a position of executive ability and popularity, and Celeste surely possesses both.

Celeste is much interested in Art and some day we expect to see her name among the noted interior decorators.

"Hi 'Bill,' is going to the Ball? Hired your 'tux' yet?" Yes, that's "Don," the business man of the campus. "Don" has decided to give up his business career for one in the field of chemistry. He attributes his decision to the efforts of his partners in a certain organic chem combination who were able to produce remarkable results with a small flask, a large burner, and a little H.O. Au revoir, "Don," may you reap plentifully of life's golden stores.

"Ray" belongs to that Brocktonian group which has left such a favorable impression upon our institution. He indulged in a year of practical engineering on the Conowingo job between his Sophomore and Junior years. With this able experience, he has been better equipped to attack the problems of his profession.

We are certain that "Ray's" sense of responsibility coupled with his pleasant personality will be decided assets in his future career.

Thelma is one of the college beauties, picked by the class of '27. Not only a beauty, but unexcelled in good nature and sportsmanship. Attention! Reward offered to anyone who can duplicate her pronunciation of William. Thelma unlike most of us, has always had an outside attraction. Yale wasn't so far, but when he moved to Detroit— We wonder what she will do next year.

"Coke's" philosophy on college life is, "hard study, hard work, and much pleasure. Graduating in four years proves his hard study; success in 'Bill' Whalen's courses, Broom Pushing (1, 2), Kitchen (3, 4), show the second part is true; as for the pleasure—nough said."

"Coke" has shown his natural leadership by piloting the E. E. Society through it's most successful year. There is no question as to his ability and some day we know he will be Mr. General of the General Electric Company.

JOHN WALTER CHAPMAN, A X A

Essex, Conn.

"CHAPPIE" "GERALD" Business Administration

Rope Pull (1, 2); Basketball (1); Baseball (1); Economist Club (3, 4); Vice-President (4); Interfraternity Basketball (2).

"Chappie" started four years ago in search of efficiency in the use of the proverbial slide rule, but finding this to be a start in the wrong direction he has now become an exponent of the "desk and swivel chair." If Economic marks and campus business ventures are an indication of the successful business man, "Chappie" has surely gotten on the right track.

Next year will probably find him on the road to making the business cycle loop-the-loop through the field of stocks and bonds.

RICHARD WARDWELL CONKLIN, Φ M Δ, Φ Δ, T K A

"DICK" Business Administration

Track (1, 2); Debating (2, 3, 4); Glee Club (1, 2, 3, 4); Asst. Manager (3); Manager (4); Business Manager Phi Delta (3); Soph Hop Committee (2); Student Council (3, 4); Economists' Club (3, 4); Officers' Club (3, 4); Lieutenant (4).

Culture, versatility, intelligence and personality are ably brought to us in the person of "Dick." We find him engaged in many campus activities, including a position among the famous "Ned's Boys," yet he has maintained an enviable record in his scholastic activities.

Dame Rumor has it that "Dick" has recently lost a debate, having been finally convinced that co-education has its good points. If "Dick's" future is like his past, we will some day find him in Who's Who.

GEORGE IRVING COOK, A X A

"Cookie" has a peculiar propensity for going after the higher things in life, annexing the pole vault record of the college and the Eastern Intercollegiates.

"G. I." has not let his college life suffer, but has majored in co-edding, leaving his marks on the door knob of Chi-O. It is a question whether he is more expert with the arrow than the pistol.

Having started to develop the earmarks of an honor student, "G. I." will next year be batting for a thousand in the field of business.

"RUTH" Most Popular Woman Home Economics
Assistant Treasurer, Class (2, 3); House President (3); Secretary, Phi Delta (4); Tennis (1); Secretary A. A. (3); Manager Tennis (4); Soph Hop Committee.

And now we come to Ruth Lucile! Not just happen upon her, for Ruth is individuality personified. Her unusually cheerful disposition which has remained intact for four years, is her chief ally. Perhaps because of this reinforcement Ruth has plunged forward to the "ed" line. Believing that variety is the spice of life, she has unconsciously added a new notch in her belt every year. And who could forget, "Go 'way, Sir!"

ALTON HENRY COON

Providence, R. I.

"AL" Electrical Engineering
E. E. Society (4); Glee Club (2, 3); Track (1, 2); State College Players (4).

"Al" is one of the few good banjoists on the Campus and made a hit with the "Hawaiians." Very quiet and reserved, he was the life of any party when a "uke" was to be had, for one could not help but burst forth in song when he strummed the accompanying strains. Tickling electric currents always interested him, and this perhaps accounts for his choice of vocation. Lots of Luck, "Al," but do be careful of "strong currents!"

M. ESTHER CRANDALL, $\Delta Z, \Phi \Delta$

"KID" Most Versatile Woman Home Economics
Class Basketball (1, 3); Hockey (2, 3, 4); Panhellenic (3, 4); President (4); Student Government (4).

When a fellow needs a friend, "Kid" is the kind of a person who always responds and we are all very fond of her. Her hobby is bacteriology in the class room, and in the open it is canoeing. In mental pictures we have her chopping wood at dawn on a house party, or peeling onions in the middle of Hundred Acres (culinary technique-peel onions under water). We were no-little surprised when, October last, she appeared with a Beta Theta Pi pin below her own. We're certain that she will be successful in whatever career she chooses and wish her all happiness in the future.

"Frannie," of D. U. Fame, who takes time out now and then from her diligent study of the ciliated protozoans and their relatives, to shake a wicked hockey stick at the world and its cares. Without her daily epistles to and from Maine we fear the Kingston post office would become a mere memory.

"CAGEY" heard that the world needed a Steinmetz,—so he came to Kingston to prepare himself for wrestling the "E's" and "I's." "Joe" has always been an enthusiastic student—his name having bedecked the honor roll frequently. Yet studies were a minor sport with him, since he possessed a weakness for week-ends—Providence being his field for social endeavors. We have always found "Joe" a pleasing companion and if personality plus points towards success he has a good supply of both. Best wishes,—"Cagey."

Does anyone desire information concerning Nicaragua or the Jury System? Just call on "Dottie." She is exceedingly versatile. Debating is not her only activity, for she has been manager of our basketball team, and scholastically she is among the best, making Phi Kappa Phi and winning the Economics prize in her Junior year.

The ability which has carried her so successfully through her college career, her dependability and determination will certainly gain for her the highest position of her chosen profession.

"Toot, toot," the New York train stopped at Kingston and left our "Eppie" at the station four short years ago. He came to us from New Haven Collegiate Prep School in quest of knowledge and to teach the Rhode Islanders some basketball for which he was noted. He soon made himself known on the basketball court and then proceeded to show the profs that athletes could make Phi Kappa Phi and Tau Kappa Alpha.

"Eppie" intends to further his education in some graduate school and we all wish him the best of luck.

"Shake" is one of the best liked fellows on the campus. Entering vigorously into scholastic and athletic activities at Rhode Island, he should be well qualified for coping with the business world. As a member of the "Business Ad" course he has taken to managerial positions as readily as a duck takes to water. In the annals of his college he will be listed as industrious and faithful to both his studies and his friends.

Who has never met Ida, the actress, debater, and athlete? The girl with vim, vigor, and vitality, ready for a good time or to help the other fellow. Whether she is playing the role of a dashing debutante or earnestly lauding our foreign policy she is equally capable.

When in the future we hear of Ida, we know it will be among the foremost business women.

Assistant Editor 1929 "Grist;" Frosh Cross Country Team; Freshman Basketball Team; Varsity Basketball (2, 3, 4); M. E. Society (2, 3, 4); Polygon (3, 4); President (4); Officers Club (3, 4); Captain R. O. T. C. (4).

Here is the man who saw every nut and bolt of the building program go into place. "Bill" is an ardent exponent of engineering from a practical viewpoint, and spent a good part of every day in the buildings during their construction, studying all the details. "Bill's" clear, logical thinking has solved many a problem on the drill field, and in the life of the fraternities, which he guided as Polygon President.

"Cozy Dan" has certainly done his bit promoting Rhody's athletic welfare, which is the sentiment of those of us who saw him captaining a game team through a "tough" football season.

He is an author of note, having written more tentative schedules than any man now in college and this literary propensity has earned for him the title of "Conflicting Dan."

As a "B. T. U. Chaser," among the Mechanical Engineers, "Gal" has done well. The mechanical field will soon have another competitor for Engineering honors.

"Little Ormie" is an adopted son of '29. He first entered Rhode Island with the class of '27, and after the termination of three successful years of study he joined the college of "hard knocks" for two years.

Ormond is a natural born musician; his drums take a mean beating in the college orchestra and his xylophone resounds to his majestic taps in the college Glee Club Concerts. He has had all of the trials and tribulations which are common to engineers, and through them all comes up smiling.

HAROLD BECKER GERLACH, P I K

"HAL"

Freshman Baseball; Corporal (2); Rope Pull (2); Track Squad (2, 3); Class Football (2); E. E. Society (3, 4).

"Still waters run deep" and "Hal" is several feet deeper than the most placid of waters. Our first impression of him was a quiet and unassuming youth, but!

"What does who know about what, and why?", he queries as he breaks in on a league, high class bull sessions being his favorite indoor sport.

Under Prof. Anderson's able tutelage, our "Hal" has acquired sufficient knowledge of E. E. to shock the electrical world, although Lanza provided several boulders to make his path a little different from one of roses. Well, "Hal", may all your circuits be closed with the key of success!

A pleasing personality, coupled with generosity, and Alice's individual "talking" ability—her success in the future goes unquestioned.

To some "Grif" appears quiet and reserved, but not so to those who know her. Since her sophomore year the train service between N. H. U. and R. I. S. C. has been well supported, also the U. S. Post Office. However, all her interests are not in N. H., for whenever there is a poster to be made, printing to be done, or original invitations to be made, she can do it.

Here, folks, is the Chief of the Chemical Squad. When "Tom" was a conscientious freshman, Phi Kappa Phi was on his list of activities, and for two years he held to the straight and narrow, finally becoming disillusioned and increasing his social scope. Always a lover of things militaristic, "Tom" is now a full fledged second lieutenant in the Reserve Corps.

Throughout all of our four years' association with "Tom" we have yet to hear from his lips other than a good word about his professors or about his fellow students. Is there any higher recommendation of a man?

A gale of laughter,—a crowd of students holding their sides while Lucy is going into great detail about something or other.

"Lou" has a serious side; she is a clever actress, a good sport, and an unusual student.

As yet her future is undecided but we hope that she will be as successful and cheerful as she has been in the past four years.

We all know "Peggy," the only Titian in our class who had been prominent in many activities on the campus. She possesses the lovable qualities of joyfulness and good nature. A graceful dancer, a sense of good humor has always made her presence desirable.

We could never understand how Mother Nature could claim "Peg" and "Lucy" to be twins, but after being with us four years, we can readily realize that nature never lies.

A pleasing personality, and a broad-minded attitude are sure to make "Peg" appreciated by all those with whom she may associate.

Possessed of a keen sense of humor and loads of ambition "Al" came to R. I. to put East Providence on the map. As one of the best business managers in the history of the Beacon, he has accomplished his purpose and helped to make the college weekly what it is today.

But "Moon's" most successful campaign was conducted at Nantucket where he proved one of the most accomplished bell hops on the island.

This, however, did not interfere with his studies, and soon "Al" will enlighten the world with "Andy's" teachings.

She is an able executive, a charming hostess, exceptionally artistic, and a good athlete, winning renown in the latter field through basketball.

A fraternity dance without "Ann" just can't be the real thing. We know that wherever she may be, "Ann" will go "big."

"Honest John" has for four years been a diligent purveyor of knowledge, fame, and feminine companionship while at Rhode Island. His little "Phi Kappa" key is mute evidence of his well deserved success in the first line of endeavor. Managership of Rhody's greatest little basketball team would seem a good indication of his success in the second.

As a chaser of "Protozoan" and "bacteria" during his stay at Rhody, "Honest" has certainly made a good start towards filling the shoes of some eminent Zoologist or Bacteriologist.

Besides being one of the most natural actors to take part in our college plays, "Hy" is also a debater of some note and a lover of sports. When his abilities failed to earn him recognition as an athlete, "Hooch" turned his efforts to another field, that of the realm of "sport writers." Although he plays best at baseball, we always like to think of him on the basketball court, where his sensational play coupled with accurate shooting and maneuvers, thrilled us continually. His scholastic achievements have only been outshown by his athletic prominence.

Did you ever hear the story of Ronald Faunce's adventures in South Africa? If not "Dan" will tell it to you, or even one better. Story telling certainly should have been added to the above activities. Last, but not least, "Dan" is the Carmine Canine king of Beta Phi.

Clink, Clink, here comes "Peggy," the most active girl in our class, with her Phi Kappa Phi and Tau Kappa Alpha keys keeping time with her quick step. As president of the Student Government Association she has attained the highest position available to co-eds.

She aspires to become a captain of Industry, and at the same time marry and raise at least five children. And we honestly believe she will succeed in doing it, and run for congress for good measure.

"Ole's" motto has been "Don't let it worry you." His constant smile has won for him many friends among the profs and students alike. "Ole" seems to get more real pleasure out of his work than most of us.

With his mechanical engineering ably abetted by several years of outside experience, "Ole" should be well prepared for his chosen vocation.

Behold our "Lew," master of ceremonies at all "bull sessions" with an unlimited supply of stories and a method of telling them which would bring tears to a glass eye. During hunting season "Lew" is seen with a shot gun in one hand and a bale hook in the other looking for game. He is a talented jazz pianist, to date he has wrecked three pianos. He does not neglect his studies, and with his pleasing personality should achieve success.

Here he is. The man from Westerly, who evidently holds some stock in the N. Y., N. H. & H. But, after commuting for a while, he sold out, and joined the campus throng and revelled therein. Feeling the call of the wild, and the challenge of Jackson's courses, "Foch" became a Chemical Engineer, and proved his worth as a student. The only chemical engineer in captivity without a Jackson make-up chalked on his record. Can you "feature" that?

Well "Foch," all your host of friends wish you the best of luck as an acid juggler.

Extrovert, leader of glee clubs and armies, business man, athlete and student (without being the proverbial grind). "Pete" is all of these, and in all has done a good job. Our Glee Club for the past two years can attribute its success largely to "Pete's" efforts, for Monday evenings of the past four years have found him with the college vocalists. The business world is his for the asking, for here's a fellow that is going to be successful in making friends as well as million dollar deals.

Here he is folks, Scituate's bid for recognition in the eyes of the world. To accomplish this mission "Frank" immediately set to work and for two years proved one of '29's best students.

Beginning his third year as a student of the Culinary Arts in South Hall, may possibly account for his failure to continue his previous pace. We wonder. After knowing "Oscar" for four years we feel sure he will make the grade and be one of Pa Webster's famous dam (?) engineers. At the end of his college career we cannot help but add "well done, Frank."

Well, here is another boy from Newport. Although "Tom" is not an athlete, he has shown his college spirit by being an ardent rooter of Rhody's teams. In the four years that he has been with us, he has won the respect of all. His success in Captain Carter's army is just one of his many accomplishments. By his serious hard-working attitude, we feel confident that "Tom" will come through with flying colors in the business world.

In the fall of 1925, New Bedford bequeathed an ambitious youth to "Rhody" in one "Ted" Pykosz. He immediately settled down and made his presence felt by the numerous activities in which he took part, climaxed by his election to the captaincy of the Cross-Country team in his Senior year. Although not a victim of the Terpsichorean art, he has a pronounced weakness for the fairer sex. We feel sure that his pep and enthusiasm will carry him through to a successful future in all of his ventures.

Attention to orders! This handsome young man with the dark brown eyes and entrancing smile is our snappy young adjutant as well as being a front row member of the first tenors in the glee club. The outstanding player in any game of tennis, basketball, or football, he is at home in the water or on the dance floor. It is needless to say that he finds extreme favor in feminine eyes as a model young gentleman. May success and prosperity be with you always "Joe."

The expression that "time changeth all things" is proven by "Scotty." When he entered Rhody as a freshman, he was an innocent, unsophisticated youth. What a change! Clever, witty, and debonair, he leaves us.

"Scotty" has his ups and downs in pole vaulting, but has stuck it through for four years. His eternal youth is the envy of the coeds, who gently jibe him with the remark, "Are you a freshman?" Methuselah may have a competitor in this lad.

"Scotty" needs no introduction to us, for he made an enviable record as a football player alone. He achieved the unusual honor of winning his R. I. after one season on the gridiron.

"Scotty" is also a weighman of note, throwing the discus being his specialty. He has done exceptionally good work in interfraternity athletics, particularly in basketball.

In the future, no doubt, "Scotty" will be quite the authority on the "ups and downs," and the "whys and whens" of the economic world.

Quite a rare individual, this "A. Z." You never have to ask who injected those strange bits of humor into those Beacon editorials, for you'd soon know that only "Art" could be so comic and still be popular. Editors, you know, are seldom liked. "A. Z." is a runner, too, and whenever he scampered down the end of a cross-country race, you'd soon notice his elongated legs—and then that smile. Some say his future is in radio, but we believe he'll some day edit the "P Journal"—or possibly the N. Y. Times.

"Stenny" is the grandfather of the class, a man of high ideals and ambitions, quiet and reserved, with a keen sense of humor and a pleasing personality. After fighting the "school of hard knocks" for eight years, "Stenny" returned to high school and then came to R. I.

Throughout the four years "Stenny" has been "high man" in the B. A. course. With the passing of years we expect to find him the "high man" of his profession. Such determination and ambition are rarities peculiar to success.

When "The One Great Scorer" comes to write against Stanley's name, He'll write not whether "Stan" won or lost, but how he played the game. This has been "Stan's" spirit throughout his short stay at "Rhody."

A glance into the future will see Mr. Szulik a happily married man at twenty-five, and New England representative of the "Consolidated Chemical Co.," with his able assistant Mr. "Ted" Pykosz, incidentally his closest friend.

"Charlie" is one of those fortunate individuals who makes studies and "education" fit together to a nicety. That his intellect is in direct proportion to his height may be proved by the way he steps over "Lanza's" many stumbling blocks.

"Charlie" is now engaged in working on a new type of towel to wipe out the initial condensation from a steam engine. On the strength of this research work, Brown and Sharpe have engaged this budding genius to solve many of their complex engineering problems.

Massachusetts did one good thing when it gave us "Our Bill," and Rhody says, "Thanks a lot."

"Bill's" clean sportsmanship and frequent cries of "Judas Priest" have made everyone respect and admire him. Athletically speaking, "Bill" was one of our best, being one of the three to secure letters in three major sports.

Chicopee Falls is bound to be a better place to live in when "Bill" leaves Rhody to take up the responsibilities of City Engineer.

"Milly's" work, as coach for Phi Delta, will long be remembered. She is exceedingly versatile and popular, a good student, a lover of books, and music, and foremostly a true friend.

President Wright: President of one thing or another ever since he matriculated here in his sophomore year. We're inclined to wonder what he'll be president of in the next ten years or so. An up and coming young man who cannot be denied—add to that an orator and debater of no mean ability and we have "Ken" Wright. Though he is neither the pride of his professors nor an outstanding athlete he has the respect and good wishes of all as he leaves Rhody's halls.

"Yars, folks," this is our little "Joe," who came all the way from Gill, Massachusetts, where men are men, and women—well you know! After four years exposure to Jackson's equations and chemical laws, he still remains the same smiling, unassuming chap, always ready with a grin to undertake any new form of deviltry, and yet, who would suspect it? They say—don't whisper it to a soul—that he has been the despair of "Bill" Whelan and his gang of campus police. But "Joe" has a serious side to his nature and we feel confident that he will win reknown as a chemist after he leaves the portals of Rhody. Here's plenty of luck, "Joe."

He showed himself as capable as any in the "frat" games and won a position as chief "mixer" in these "meles" for four consecutive years. When he leaves us, there will be the best wishes of the students going with "Zi."

The Class of 1930 needs no introduction, as its members have emblazoned its numerals with renown by their earnest efforts in scholarship, athletics, dramatics, and the numerous other activities which are so important in college life. Being one of the largest classes to register at Rhode Island, we had many men who showed promise of developing into star athletes. These men contributed a great deal to the success of two of the most outstanding teams developed at the college, and the leaders elected for next year's teams, from our class, have, by their grit, ability and sportsmanship, proven themselves worthy of the honor which has been conferred on them.

With our Freshman year out of the way after turning out the strongest class track team to represent our Alma Mater in many years, and gaining recognition amongst the Upperclassmen, we passed the first milestone and entered upon the responsibilities of a Sophomore. For the first time we realized that we belonged in Kingston and were thankful that some guiding hand had directed us to Rhode Island; to its real friendships and fruitful associations. Our Sophomore year ended all too soon, and, with the summer passed, we again returned to our beloved Alma Mater, and to celebrate the big event in our class career. Prom—Kingston in May. With unheard of facilities, and true class support, it was a huge success. The memories of those days in May will never depart from our minds, and in the future when we are far distant from Kingston, we will feel as Browning did towards his beloved England, and we will say,

Oh, to be in Kingston
Now that May is here.

And now with our departure just over the horizon, is it any wonder that we resolve to climax "the happiest moments in life's fleeting hours," and make ourselves worthy of the distinction which we must uphold as Seniors?

Class History of 1931

HILTON D. ROBERTS
Alice C. Shaw
SARAH F. BARKER
THAYER W. CHASE

The Class of 1931 is creating a record that points towards being the best any class will ever have left at Rhode Island State. Its achievements during the first half of its four year interim reveal that the class has distinguished itself not only in scholarship and dramatics, but also in the athletic and forensic fields.

Though young, "green," and bewildered by those experiences that are so commonly attributed to that world called collegiate, we nevertheless were soon capable of organizing ourselves. Our freshman football team was one of the greatest ever to be represented here since the inception of freshman sports. The clear-cut victory over the eleven from Storrs was the first ever to be registered over a Connecticut team. The basketball, track, and baseball teams were likewise of strong character as was witnessed by the fact that many Sophomores managed to make the Varsity teams this past year.

Achievements in other fields are even more noteworthy. The Soph Hop, customarily the "white elephant" of previous years, was for the first time a financial success. The Class of 1931 can point to that success without feeling that it is priding itself with too much glory. The debating teams possess many Sophs: Phi Delta has even a larger percentage within its numbers.

But the Class of 1931 feels it cannot stop here. To cease performing its duties would be selfishness on the Class' part. So it continues its way, helping to broadcast to the world that it is ever becoming a bigger and better Rhode Island.

Freshman

Class History of 1932

MAURICE M. KRAMER	President
CONNIE STAFFORD	Vice-President
WINIFRED FRANCIS	Secretary
HARRY R. LEWIS, JR.	Treasurer

September of nineteen twenty-eight marked the beginning of an era of endeavor on the part of the class of nineteen thirty-two in forging for themselves a position in the annals of Rhode Island State College as worthy as that attained by the other classes.

The chaos of Freshman week will never be forgotten by those who attended the numerous lectures on how to study, school spirit, and what not. Many no doubt hopefully looked forward to the Freshman Informal, which culminated a week of nervous tension, and shall we confess it—a tinge of homesickness. Extra-curricular activities drew forth a large number of our members. Some, more versatile than others, came to the fore in their respective fields of activity. Football, basketball, baseball, track, and cross-country showed our athletic prowess; while our representatives in Dramatics, in the Glee Club, in the Orchestra, and Debating, and on the Beacon staff set a mark worthy of any class.

Our victories in both football and basketball over the mighty Sophomores permitted us to doff our caps one month earlier than the set date. Shall we ever forget the glorious celebration that night?

In studies too, we have excelled. We entered into our scholastic work with zeal, which speaks well for the future of our class.

High are our hopes for the future; of ambition there is plenty. We aspire to the heights, but then, we too have heard that oft quoted expression, "Hitch your wagon to a star."

Football

Football came around in early September with but five regulars back from the crack 1927 aggregation. Nothing daunted, Coach Keaney set out to place a formidable team on the gridiron.

The season opened September 22nd, with Little Rhody (they did look little), pitted against the strong team of the Coast Guard Destroyer Force. Playing full fifteen-minute periods on a sweltering day, the team put up a good game, but the avalanche of fresh men against them proved Rhode Island's downfall, and late in the third period, the third successive team of the tars put over the only score of the game.

The next week the team traveled to Orono and threw a scare into Coach Price's camp. Maine scored early in the game, but Rhode Island came back fighting, and in a beautiful eighty-yard march up the field, featured by Kearns' running, scored when Capalbo pulled down a forward pass in the end zone. A light team, and no substitute material, however, proved too much, and Rhody lost to Maine 20-6.

On October 6th, the team broke into the winning column, taking the U. S. Coast Guard Academy into camp 6-0, "Chick" Roberts scoring the lone touchdown in the second period.

On October 13th, Homecoming Day at Kingston, Rhody lost to New Hampshire 12-0. The game was played in a rainstorm, and Rhody proved to be a good mud horse during the first half, holding the far heavier opponents scoreless. In the third period, the New Hampshire "steam-roller" scored a brute force touchdown and late in the game a New Hampshire man picked up a loose ball and ran fifty yards for the second score.

The following Saturday, the Blue and White rose to unexpected heights and turned back the Naval Training Station, which team later won the Service championship of the East by defeating the Quantico Marines. Magoun and Roberts worked well in the backfield, while Lazarek was in on almost every play attempted by the opponents.

Rhody went after Lowell Textile next, but the loss of her quarterback on the first play of the game so incapacitated her that she was forced to return home on the small end of a 21-0 score. The next game was the Worcester Polytech game, about which the less said, the better. They won, 13-0.

Playing against our old rivals at Storrs, with their backs to the wall, the team held off onslaught after onslaught of the fast charging Connecticut backs. The team was worn out by its efforts, and succumbed, Connecticut winning 24-0.

Rhody broke a nine-year "jinx" when Dick Howes scored on a forward pass against Brown, but their second and third teams won the game, after a hard fight, 33-7.

The main reason for the lack of success during the season was the inability to supply substitute material to carry on while the hard-working first eleven was taken out for a rest, this resulting in the saying of the Coach that, "The team that starts will finish unless they get killed." Captains Galvin and Magoun, and Bill Trumbull are sure to be missed, but with only these three graduating, the season of 1929 ought to tell a different story, and we wish Captains Lazarek and Howes a more successful season.

Capt. Galvin

Basketball

On December 12, 1925, five green jerseyed youths trotted out on the floor and opened the most successful season ever experienced by a yearling team at Rhode Island.

Three years later, December 8, 1928, these same five men trotted out on the floor against New Bedford Textile School and commenced the most successful season ever experienced by a varsity team at Rhode Island.

In the Freshman year they won thirteen games and lost none, and in their Senior year they won fifteen games and lost one, truly a remarkable record!

The only change made in the team was the replacement of Fleming (who had put on much excess avoirdupois in a year's absence from the court) by Fred Ackroyd at center.

Because of the impossibility of choosing one leader from four so equal players, Coach Keaney named four captains for the season; Hurwitz, Trumbull, Magoun, and Epstein.

That they all four were able leaders is made clear by the fact that each of them was picked on several all opponent teams and Hurwitz received the distinctive honor of being named on the mythical all-New England five.

These four men are graduating this year and Rhode Island is losing four of the greatest players ever to represent her on a basketball court. They kept the new gymnasium record clear and we hope this will be true of their successors.

The accounts of the games are something all students know by heart but we shall attempt to give a few high lights.

New Bedford Textile, U. S. C. G. Destroyer Five, U. S. N. Training Station and Boston University were taken into camp easily.

The first tough nut to crack was the St. Stephen's quintet; they started off fast but some beautiful long shooting by Al Hurwitz and "Horse" Magoun, Rhody's stellar guards, took the wind out of their sails and we won 45 to 26.

Arnold College, Coast Guard Academy, and the University of Maine fell before us. The score of the Maine game, 48-28, was due to a scoring spree by Ackroyd.

The Connecticut game at Kingston drew the largest crowd of the year, the new gymnasium being filled to capacity. The boys came through, thanks to the wonderful shooting of Hurwitz, 30-25.

The game at Northeastern was thrilling, going to two overtime periods before Rhody came out on top 49-43. Bill Trumbull's steady shooting kept Rhode Island always up in front in this game.

On March 2, the team lost its only game of the season to their rivals, Connecticut, by the score of 38-27. As the Coach said later (we don't dare print what he said at the time), "It does us all good to receive a set-down every so often."

The Brown game at Kingston—it just rained baskets, that's all—we believe Brown got something like one basket the first half, while we collected thirteen!

The Coast Guard Academy game at New London was another good game. They led the first half, but the boys came back strong to win 32-23.

The final game of the season was at Brown, where we won 29-21. At the end of the season the team was banqueted by Doctor Edwards, and was awarded blue letters on white sweaters, a deviation from the usual custom, to show exceptional ability. The first team, Hurwitz, Trumbull, Magoun, Epstein, Ackroyd, and Manager Heuberger received these.

Baseball

What appeared at the outset to be only a fair season for Rhode Island in baseball turned out to be a most glorious one.

The main reason for the pessimistic attitude adopted at the outset of the season was the lack of pitchers. Captain Draghetti was the only twirler left to carry on through a schedule of sixteen games. But what we lacked in quantity we made up for in quality, for "Drag" pitched ten of the hardest games and came out on top in nine of them, and poor support accounted for his only loss, and incidentally the only loss of the season.

Out of the twelve victories there were many choice games which did our hearts good to witness.

The first of these was with the strong Boston University nine which came down and went home on the end of a 15-5 score, the game being featured by the heavy hitting of "Curly" Stevens.

Coach Keaney's alma mater, Bates, came and after a nip and tuck game for nine innings, we came out on top 3-2, thanks to a stupendous home run by Ted Pykosz in the last half of the ninth inning. Ted made three out of the six hits made by Rhode Island.

Just to show Brown that we weren't lucky when we beat them two years ago we took them into camp again to the tune of 2-0, "Drag" letting the Bears down with three hits.

Next came two straight victories over Connecticut 5-2, at Kingston, and 9-8 at Storrs, the game being the first baseball game won on Connecticut's field in recent years. In this game Hurwitz did a pretty job of relief pitching, coming to "Drag's" rescue and saving the game for dear old Rhody.

It isn't always that you can save the best things to the last, but the 1928 team surely did. On June 7, the team travelled to Cambridge to (as a Boston paper put it) "participate" in a game with Harvard. Well, we participated all right, and Harvard precipitated all right, and, anyway, we won 2-0.

Draghetti allowed only three hits but was "heart-failure brothers" on the passing act, giving out eleven free tickets. Kingston was a great place to be that night, with a bonfire and cheering, and even the co-eds were let out.

The only setback of the season was a 7-4 defeat by Colby on April 27, the team hit well, but errors combined with walks gave the visitors the breaks and the game.

Other victories turned in were over Lowell Textile twice, Worcester P. I., Newport T. S., and St. Michaels.

Dr. Edwards again proved the grand old sportsman when he presented the members of the team with gold baseball charms in honor of their highly successful season.

As this goes to press we wish to extend our heartiest sympathy to Theodore Pykosz, who after leading the 1928 team in hitting with an average over .500, has injured his ankle so badly in 1929 pre-season training that he will be out for the year.

Track

Capt. G. I. Cook

Rhode Island enjoyed a very satisfactory track team in 1928, due mainly to the fine work of the Seniors on the squad. Among those of the class of 1928 who graduated, and left track history, as well as having many records credited to their names, were "Bob" Talbot, "Speed" Randall, "Bob" Bruce, "Laurie" Dring, "Pick" Hammett, "Eddie" Foster, and "Eddie" Intas. Others who contributed to the fine work of this group were George Cook, Howard Droitcour, "Dick" Howes, "Phil" Lenz, "Bill" Partridge, "Wally" McLean, and "Lonnie" Johnson.

The season opened April fourteenth, with the Varsity trimming the Freshmen 124-11. The Varsity took all firsts, but time in all events was poor due to bad weather conditions. On April twenty-first, we went down before Brown 70-65 in the closest of meets. The honors in first places were even, each team winning seven, and tying for the other. Captain Talbot won three first places, in the hundred, two-hundred, and broad jump. Bruce won the hammer readily, while Cook tied with Captain Stevens of Brown for honors in the pole vault.

The next Saturday we gave Connecticut the worst defeat that Rhody has ever given a rival in Track. The final score was 112-23. We won fourteen out of the fifteen first places; Connecticut getting one lone first in the high hurdles. Captain Talbot was the star in the meet, getting his usual three first places, and breaking the college record in the broad jump with a leap of twenty-two feet, eight inches.

On May fifth, the team went down to defeat before the powerful and well balanced Holy Cross aggregation. Although beaten, our team put up a wonderful exhibition, as evidenced by the jumping of Lenz and Johnson, who jumped six feet and one-eighth inches, only to place second.

The team entered a team in the New England Eastern Inter-collegiate Track Meet, and met such colleges as Worcester Tech, Connecticut, Springfield, Tufts, Norwich, Mass. Aggies, Northeastern, and Trinity. We managed to place second to Northeastern with a total of forty-one and one-half points. Captain Talbot tied the record in the hundred and two-hundred yard dashes, and broke the record in the broad jump. Bruce broke the record in the hammer throw, as did George Cook in the pole vault. Rhody's other first place was turned in by "Zip" Partridge in the javelin throw.

With such a good group of performers dropping out at the same time, it will be hard for Rhode Island to keep up to the standard set by them, but with the addition of the new board track, and under Tootell's masterful tutelage, Rhody is sure to stay in the track spotlight. We wish the best of luck to Captains-elect George Cook and Wallace McLean.

Summary of 1928 Track Season

Rhode Island defeated Freshmen	124-11	April 14th
Brown defeated Rhode Island	70-65	April 21st
Rhode Island defeated Connecticut	112-23	April 28th
Holy Cross defeated Rhode Island		May 5th

Rhode Island second in New England Intercollegiates, scoring 41½ Points,
and breaking several records.

Cross Country

Due to loss by graduation of three of last year's cross-country stars, Larry Dring, Benny Fine, and "Pickles" Hammett, this year's team was somewhat weaker than usual. Nevertheless, the season resulted in two victories and one defeat. If Captain Pykosz had not early in the season wrenched his ankle, the record would have been unblemished by defeat, because Pykosz would have finished much better in every meet.

The following summary gives the order in which the team finished in each race, the missing numbers indicating places taken by opponents:

Rhody 26	Rhody 29	Rhody 24
Brown 33	Boston Univ. 27	Worcester Poly. 32
2 Bean	1 Bean	1 Bean
4 Hersey	4 Hersey	3 Hersey
5 Armstrong	7 Johnston	5 Pykosz
7 Smith	8 Pykosz	7 Anderson
8 Pykosz	9 Anderson	8 Osterlund
9 Szulik	10 Smith	10 Smith
10 Magoun	12 Armstrong	12 Johnston

Bean and Hersey, consistently the best performers, are Juniors and will be available next year. Jimmy Armstrong and Eric Osterlund will also be here next season, and these four, plus three of the freshman team, will make a strong aggregation.

Cross Country at Rhode Island

The team of this year has done excellent work in carrying on the tradition of those who went before them in bringing the White and Blue over hill and dale to victory. In recent years the Cross Country record has been continually in danger, and has been broken several times. Members of the class of 1929 remember with pride the exploits of such men as "Bob" Strong, "Laurie" Dring, and "Pick" Hammett. "Bob" Strong broke his own record several times while representing the school. After his departure, his old teammate, "Laurie" Dring, again lowered the record for the tiring "long course."

Strong, running in competition with DeMar, Hennigan and other famous veterans of the marathon trail, placed first in the marathon conducted by the city of Providence two years ago. He repeated in another marathon, against competition of like calibre a short time later, with a smaller handicap.

The tradition is being carried on. Men like Pykosz, Szulick, Smith, and others have done the work during the past season, and a fast group is on hand for next year. Armstrong, Hersey, Bean and others will run, assisted by several prospects from the Frehman team of the past Fall, a team which took every place in its contest with the Brown yearlings.

With such material at hand Tootell should be enabled to carry on with an excellent distance team for the next three years.

Co-ed Athletics

Co-ed athletics opened in the fall with field hockey taking the place of the regular gymnasium classes. With the girls having Lippitt Hall for their own gymnasium, basketball was enjoyed and played by more girls than in any previous year.

A class league was organized, and at the end of an exciting series, the Seniors, Juniors, and Sophomores were found deadlocked at the top. In the playoff, the Sophs, led by Captain Mary Chase, emerged the victors.

Basketball relations were resumed with the Connecticut co-eds this year, and the first game was played at Lippitt Hall on February 16th. The game was closely played, and at the end of the first half Rhody led, 13-10, mainly due to the efforts of Captain Humes, who scored ten of the thirteen points. In the second half, with Mary Chase and Rosalind Mokray smothering Connecticut's offense, and with "Kitty" MacKay having a shooting streak, Rhode Island came out victorious, 29-18.

The co-eds travelled to Storrs on March 2nd for the return game, and won 35-18, it being the only victory scored by Rhode Island on that disastrous day.

Miss "Chin" Lee received a bad floor burn in this game which necessitated her leaving school for several weeks, and her absence during the playoff of the class league was keenly felt by the Junior team.

For the first time, this year strict training rules were inaugurated, and a training table was established. In the course of the season, the team was more or less seriously incapacitated by the loss of two of the players, who were suspended for the breaking of training rules. Prospects for next year are bright, although the Captain, Miss Martha Humes, and Miss Rosalind Mokray are to graduate this year.

In the spring, the co-eds turned to hiking with vim, and baseball was played by the great majority. A class tournament is to be held in baseball as in other sports, no outside teams having been placed on the schedule as yet.

Girls Basketball Team

MISS MARTHA HUMES Captain

Under the leadership of Miss Humes the girls' basketball team enjoyed an unusually successful season. Most of the work is intra-mural, but relations with Connecticut were renewed again this year after a lapse. The games resulted in the usual victories for the Rhode Island co-eds.

Believing that military service is an obligation of citizenship, and that the greater opportunities afforded college men for the study of military science place upon them certain responsibilities, the Cadet Officers in various Universities and Colleges conferring baccalaureate degrees, formed the National Society of Scabbard and Blade, in order to unite in closer relationship the military departments of American Universities and Colleges; to preserve and develop the essential qualities of good and efficient officers; to prepare themselves as educated men to take a more active part and to have a greater influence in the military affairs of the communities in which they may reside, and above all to spread intelligent information concerning the military requirements of our country.

The Student Band

Leader-Manager S. EDWARD SULKIN
 Faculty Advisor CAPT. PAUL D. CARTER

The Student Band, organized in the Fall of 1928 by S. Edward Sulkin, has most faithfully played at all athletic contests, even accompanying the teams to Connecticut and Brown for the contests there. This unit, arrayed in the uniforms they provided for themselves, has added very much to the pep and gusto characteristic of the games during the past year.

For the basketball games in the new gymnasium a twelve-piece orchestra was formed, which played the latest popular numbers as well as the college songs.

Long may the spirit of the members of the Student Band continue to fire our student body with enthusiasm and keep up the true Rhode Island spirit at all games!

"Spirit of Rhode Island"

The R. O. T. C.

A résumé of the recent history of the Battalion at Rhode Island State College shows that much progress has been made in the Military Department. The College has attained distinguished rank three times; then the War Department discontinued both the rank of distinguished college and the annual inspection by officers of the Washington department. Under the new system Corps Area officers inspect all the units in their respective areas, instead of the few picked colleges of the old system.

In 1925, the Battalion was under the command of Student Major Ralph Shaw; in 1926, under Student Major William Marcaccio; and in 1927, under Student Major H. Vernon Van Valkenburg. Much credit for the progress of the Battalion is due to these three men as the R. O. T. C. received distinguished rank under all three.

In 1928, under the new system, Student Major Wilhelm Johnson took command, and the unit showed such marked ability that it was highly praised by the Corps Area Inspectors.

This year the unit has increased in size to four companies and, with Student Major Lawrence McClusky at the helm, promises to surpass those of previous years. The Battalion has a large group of exceptionally able student officers to complete its complement. As a part of this year's work the students have adopted regulation garrison belts, and highly polished brass buttons. The band, the best ever produced here, has new trappings of white web material, with leggings to match. This equipment has done much to make the "snappy" appearance upon which the unit has been complimented this year.

For the past two years the unit has paraded in Providence on Armistice Day, and both times was praised highly by the officers of the State for their impressive showing.

The greatest credit, however, is due to the regular Army Commandants in charge. Their unflagging effort, and indomitable enthusiasm has aroused an unprecedented interest on the part of the students. To them the College owes a debt.

The College Orchestra has passed through five years of successful performances, and this year, under the management of S. Edward Sulkin, it has performed in conjunction with the Rhode Island State College Players at the various dramatic performances.

The repertoire of the Orchestra has been materially increased and they have been able to play several of the outstanding overtures at the Assembly hour.

The Orchestra has always performed for the various college functions with the spirit and coöperation necessary for the success of the various presentations.

The Rhode Island State College Players were organized for the purpose of developing students in stage technique, of such a professional type as to permit them to appear successfully in public.

The plays chosen by this group are plays which represent some period in the development of the Drama, and are presented after a careful study of the interpretation.

The Players are the only group to present themselves before an audience in Providence on the stage of the theatre. This group presents the annual Commencement play each year.

Tau Kappa Alpha

T. K. WRIGHT	<i>President</i>
I. O. FLEMING	<i>Vice-President</i>
D. A. O'CONNOR	<i>Secretary-Treasurer</i>

Tau Kappa Alpha is the national debating and forensic fraternity at the College and has for its object the stimulation of interest, and the maintenance of a high standard in forensic work. Varsity debaters only are eligible to membership. Tau Kappa Alpha arranges and executes the schedule of inter-collegiate debates.

The Lecture Association

HENRY N. ARMERUST	<i>President</i>
JOSEPH H. CRAGAN	<i>Vice-President</i>
EMILY HEAP	<i>Secretary</i>
REV. CLAUDE G. BEARDSLEE	<i>Treasurer</i>
PROF. JOHN C. WELDIN	<i>Faculty Advisor</i>

Each year the Lecture Association prepares and presents an interesting and instructive series of lectures and entertainments. These are presented at intervals during the quieter portion of the college year, and relieve the monotony of this period. The lectures unfailingly draw a full crowd because of their uniform quality in the past. This year the Association enjoyed particular success.

Blanket Tax Committee

PROF. MARSHALL H. TYLER	<i>Chairman</i>
PROF. ROYAL L. WALES	<i>Director of Student Activities</i>
MR. FRANK W. KEANEY	<i>Director of Athletics</i>
PROF. JOHN BARLOW	<i>Secretary and Treasurer</i>

The Blanket Tax Committee meets with the financial members of every student organization and allots the yearly quota to each organization. Without its excellent work in supervising and directing expenditures, student activities and athletics would be in a chaotic state of chronic bankruptcy. The committee does an excellent job.

Women's Debating Society

MARGARET O'CONNOR	<i>President</i>
VIRGINIA MAY	<i>Secretary-Treasurer</i>

Organized two years ago, the Society has enjoyed two years of very successful activity. The girls of the Society have been uniformly successful both in their inter-mural and inter-collegiate debating. This year they had already overcome Pembroke and Maine when the GRIST went to press.

The Student Forum

DANIEL A. O'CONNOR	<i>President</i>
WILLIAM G. MOKRAY	<i>Vice-President</i>

Alpha Tau Gamma

As this issue of the *GRIST* goes to press, a new fraternity has its birth. Under the leadership of several earnest leaders of the dormitory group, several men recently petitioned the college committee on fraternities for a charter. Simultaneously, they requested the recognition of the Polygon, which group has the privilege of passing on the desirability of any such group which might desire admission. The matter was carefully considered by them and it was unanimously agreed by members of all the fraternities that the petitioning group be recognized and be extended the right of membership in the Polygon.

Upon this action, the college committee on fraternities approved the petition, and the group of Alpha Tau Gamma came into official being, announcing their birth as a lusty youngster by a banquet on the evening of May sixth. Their present plans are well developed, negotiations for a house being already under way. The new fraternity expects to start the new year in their own home, with their organization complete in every respect, ready to "rush" pledges next year, in friendly competition with their older Greek brethren. The celerity and efficiency with which the business of organizing the new group has been carried out speaks well for their leadership, and since only two of their men are graduating with the present class, they should be able to start next Fall on a par, as far as membership strength is concerned, with the other fraternities.

The officers of the present *GRIST* take particular pleasure in welcoming the new fraternity to our midst, are pleased to be the editors of the first annual to record its admittance to the Polygon. The organization of the new society is perhaps, the outgrowth of the recent activity among the fraternities in general, four local social organizations having become affiliated with national groups within the past two years, two of them in the past two or three months. Perhaps this new development is the beginning of a new phase in the cycle of fraternity growth, and the next year may see more activity in formation and nationalization.

Fraternities at Rhody

The administration of Rhode Island State College definitely favors the fraternity system, and provides all possible assistance to the Greek organizations. The result is a growth of the student brotherhoods which has kept pace with the development of the College. East Hall, the only large men's dormitory, was built in 1909, when the total registration was about 200. To-day the registration is about 550, yet no new dormitories have been built by the College. Two small houses have been leased, it is true, but the ten fraternity houses and two sorority houses provide most of the housing for the increased enrollment.

Fraternity progress has been marked by cycles of activity. In the period 1908-1911 Rho Iota Kappa, Theta Chi (originally Sigma Delta), Beta Phi, Delta Alpha Psi, and Lambda Chi Alpha (originally Gamma Delta Sigma) came into existence. Then there was an unbroken period until Zeta Pi Alpha (now S. A. E.) and the Campus Club (now Phi Beta Chi) were formed in 1920. Beta Nu Epsilon (now Alpha Epsilon Pi), Delta Sigma Epsilon (now Phi Mu Delta) and Phi Sigma raised their banners in the period 1922 to 1925.

Meanwhile the co-eds had been feeling the Greek letter urge. Sigma Tau Delta (now Sigma Kappa) was organized in 1914. Chi Omega began life as Omicron Alpha Alpha in 1918. Theta Delta Omicron blossomed forth in 1924 and became Delta Zeta last year.

A flurry of fraternity activity is again present. Last year four groups went national, Alpha Epsilon Pi, Sigma Alpha Epsilon, Phi Mu Delta, and Delta Zeta. Just as the *Grist* goes to press Alpha Tau Gamma has petitioned the College for a charter, and has been approved by the Polygon.

Other signs of fraternity activity are made evident by the intention of three fraternities to build new houses in the near future. The innovation of boarding in the house inaugurated by Theta Chi is being considered by other houses and may be adopted by some groups next year.

The interfraternity organization, The Polygon, and its feminine counterpart, The Panhellenic Association, have contributed greatly to the promotion of harmony amongst the groups. One of the important matters decided by the Polygon is the code of rushing rules.

Whether next year will witness the formation of more fraternal groups, or whether the present activity will die down for a few years is a question with no answer. It is one of those uncertainties which add zest to life.

...your Photograph

No other remembrance could be more expressive of your thoughtfulness. Of all the gifts that you might give, a Photograph of you will be cherished *most* because it is the one thing in all the world that no one else but *you* can buy.

You will, we feel, thank us increasingly each year for having created so faithful a likeness.
